

Project Design Phase
Proposed Solution Template

Date	11 September 2026
Project Name	Laptop Request Management System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Employees face difficulties in submitting and tracking laptop requests. Manual request handling can cause delays, duplicate requests, unclear approval status, and difficulty in maintaining request records.
2.	Idea / Solution description	Develop a Laptop Request Management System using ServiceNow. Employees submit laptop requests through a request form, managers approve or reject them, and IT administrators process approved requests. Flow Designer automates approvals, notifications, and status updates.
3.	Novelty / Uniqueness	The solution provides a centralized and automated laptop request process with role-based access, manager approval, automated notifications, request tracking, and prevention of duplicate requests within the same year.

4.	Social Impact / Customer Satisfaction	The system improves employee experience by making laptop requests simple, transparent, and trackable. Automated notifications and faster approvals reduce waiting time and improve communication between employees, managers, and IT teams.
5.	Business Model (Revenue Model)	The system reduces administrative effort and operational costs by automating laptop request processing. It can be implemented as an internal IT service using the organization's existing ServiceNow platform.
6.	Scalability of the Solution	The solution can be scaled to support more employees, departments, locations, and types of IT equipment such as monitors, keyboards, and mobile devices. Additional workflows, approval rules, reports, and integrations can be added as required.
